

Rexroth screw support: The ideal systemsolution for maximum speed with long strokes

Picture: Screw support with the drive unit AGK

Condition:

- Horizontal installation and operation

Advantages:

- High speed with long strokes (problem of bending critical revolutions with long strokes is reduced and/or solved)
- Up to 4 screw support pairs are possible
- Economic systemsolution
- Small construction and manufacturing expenditure
- Rapid mounting and easy alignment of the drive unit due to the machined reference edge on the pillow block unit.
- Easy motor attachment via locating feature and fastening threads.
