Inverted tooth chain drive, Series KH

▶ 3/8" pitch = 9.525 mm

23045

Types of guides

Standard delivery

Number of links

Lubrication

Minimum number of teeth for the sprockets

Center guide

Side guide

open, with splint pin lock
overall width $bg + 2$ mm

Number of links equal to number of pitches.

For circulating chains, an even number of links must be used.

Uneven numbers of links are permitted only if the ends of the chain are connected to external parts.

Pay attention to correct lubrication.

13 teeth

from 1 m/s \geq 23 teeth

Further information can be found in the operating instructions.

Ordering information

- Please contact our sales department with the selected drawing number: toothchain@aventics.com. You will require approval for your initial selection.
- Other delivery types and nominal widths on request.

23045

Types of guides

Standard delivery

Number of links

Lubrication

Minimum number of teeth for the sprockets

Center guide

Side guide

open, with splint pin lock
overall width $bg + 3,5$ mm

Number of links equal to number of pitches.

For circulating chains, an even number of links must be used.

Uneven numbers of links are permitted only if the ends of the chain are connected to external parts.

Pay attention to correct lubrication.

13 teeth

from 1 m/s \geq 23 teeth

Further information can be found in the operating instructions.

Ordering information
